YouSAB VPN Messenger is an easy-to-use application which allows users to chat with their buddies online. YouSAB Community Secured VoIP VPN Messenger with integrated Inter-Card Business account gives access to On-line Universal Secured Administrated Business Community platform that enables users to interact with each other in totally secured environment with the following abilities, Anonymous Internet browsing and access throught Anonymous TCP tunnels and VPN platform, Secured Instant messenger with P2P envrypted VoIP and chat, send messenges by email to offline contacts(ie. messeges sent to off-line contacts will go directly to their registration email address), Integrated with InterCard Account with direct access that allow user to buy & recharge his account balance, transfer balance to other users (to implement an online payments), view Access statment, account statement, payments, periodic account performance reports YouSAB VPN Messenger was first released in early 2003. YouSAB is a growing company with a belief in the power of enterprise VoIP (Voice over Internet Protocol) and a technology that is growing in demand. YouSAB's product was designed to combine the best of instant messaging, secure VoIP, and presence technology. With the launch of their new VoIP-based Desktop Messenger, YouSAB hopes to position itself as a leader in this emerging field. YouSAB VPN Messenger allows a user to chat with their buddies online. This enables a user to instantly connect to the system and see all the buddies they are normally able to connect to. One of the main benefits is the ability to instantly chat and make a connection to the buddy. This instant messaging feature, along with other features, is the core of a secure instant messenger system. This is how YouSAB VPN Messenger is able to offer a secure instant messaging system. One of the features of YouSAB VPN Messenger is the support for Instant Messenger. This is an instant message system that is based on a traditional instant messenger system. This means that this system is not based on a voice, but rather it is based on text. The user can send or receive messages instantly as the Internet is connected. The communication is based on TCP/IP. YouSAB VPN Messenger allows the user to instantaneously connect to a chat network which is then used to transfer data with other users and enable the transfer of data. The user can instantly connect to a chat network which is then used to transfer data with other users and enable the transfer of data. This system can be thought of as an extension of an
